

# STEM CELL IQ

| A LIFEWAVE CASE STUDY PRESENTED BY JET PARKER |

## SITUATION

In November 2022, after getting a third COVID vaccine, Steve suddenly started suffering from throat muscle spasms..

## PROBLEM

Every time he swallows (day & night) it is extremely painful. Eating/taking pills is even more difficult. Some days the pain extends to both ears.

## SOLUTION

He started using the X39 LifeWave patch on August 7 & added the Ice Wave patches on September 10, to stem the pain. Steve applied a brown patch directly on his throat. He moved the white Ice Wave patch around his neck area. He adjusted the location of the white patch each day until he found the location that eased his pain. He decided to wear the IceWave patches at night so he could get a good nights sleep while working with an ENT to treat the problem.

## RESULTS

### *Ice Wave Patches*

The brown and white Ice Wave patches are specifically designed to target pain points. Working in a polarity fashion, they often provide immediate and long-term pain relief. Steve noted after the second day of use of these patches, he woke up, for the first time in almost 10 months with very little throat pain. With continued use, his pain level remains minimal so he can get restful sleep and enjoy life and work during the day again.
